Baxter TS7000 (dv) integrated with robotic systems from Intuitive

Baxter Medical Systems GmbH + Co. KG, as established manufacturer of medical devices for operating theatres and ICUs, with office and manufacturing facilities in Germany, Carl-Zeiss-Strasse 7-9, 07318 Saalfeld and Landsberger Str. 155, 80687 Munich, hereby confirms the following:

Baxter is currently the only supplier capable of offering an operating table compatible with the da Vinci surgical robot software and interface.

To date, no other company offers an operating table that meets the technical requirements and specifications necessary for integrated operation with the da Vinci systems Xi and dV5.

In particular, the TruSystem 7000 (dv) table is the only operating solution that has been validated and is interoperable with the da Vinci robot software, with no competitive equivalent on the market.

Kind Regards,

Baxter Medical Systems GmbH + Co. KG

Thomas Pittroff
Manager Global Product Marketing
